

Chicken Netting Heavy Duty

Fencing Solutions / Pens & Enclosures

- Versatile netting for fencing and animal enclosures
- Ideal for poultry yards and chicken coops
- Heavy galvanised
- Tough and sturdy
- Heavy duty 1.4mm wire

HEAVY DUTY AND VERSATILE

Whites Chicken Netting (5cm aperture) is a heavy duty all-purpose woven steel netting ideal for poultry yards, chicken coops, plant protection and garden trellising.

It is made from galvanised steel wire for strength and additional protection from the weather. With the 1.4mm wire diameter and heavy galvanised coating, it is heavy duty enough to be used for fencing.

It comes in two lengths: 10m and 30m rolls.

Code	Product Description	Size
10459	Chicken Netting Heavy Duty - 1.40mm	90cm(h) x 30m(l) 5cm aperture
60160	Chicken Netting Heavy Duty - 1.40mm	90cm(h) x 10m(l) 5cm aperture

Handy Hints:

- To view our entire range of mesh and netting click on the 'shadow board' image in the photo gallery at the top of this page
- Beware of recoil when opening roll. Always wear gloves and eye protection when handling.
- It is recommended that new galvanised wire mesh used in aviaries and pet cages be treated to remove excess zinc that could possibly harm the pets. Shave off any zinc spikes with a utility knife. The mesh should then be scrubbed with a mild solution of vinegar (2 cups in a bucket of water), and rinsed with clean water.
- Pens and enclosures are usually constructed using steel or timber posts. [Whites Garden Post](#) offers a unique and easy lug fixing method for attaching mesh and netting. Alternatively, netting can be attached to wire, between posts, using [Whites Netting Clips](#).
