

Interlocking Steel Edging Corner

Garden Edging / Edging Panels

- 90-degree corner for interlocking edging strips
- Unique in-built interlocking system
- High-strength galvanised steel

COMPLETES THE CONTEMPORARY LOOK

Whites Interlocking Steel Edging Corner offers a decorative and modular 90-degree corner that complements the Interlocking Steel Edging Strip to build an interlocking system for your flower beds on paths, driveways or backyards. The modern steel finish adds contemporary style to any garden.

Easy to install (see instructions on the image gallery above also):

- Simply connect the edging corner by inserting it onto the previous strip from above
- Then lock the strip and corner together with the two tabs
- Using a screwdriver, bend the first tab on itself to lock the second tab in place

Code	Product Description	Height
14381	Interlocking Steel Edging Corner	130mm

Handy Hints:

- Always wear protective gloves and glasses during installation.
