SAFETY CERTIFIED MAINS ENERGISER

O'Briens Mains Energiser 220/1400 is an ideal power choice for up to 20km electric fencing around properties where there is an available, reliable 240V power supply. It is safety certified and has a built-in lightning diverter.

Robust and reliable, it is made to last with tough outer casing featuring a weatherproof O-ring seal.

Easy to use and install with simple fence terminals, hassle free mounting and a pulse indicator light.
