HEAVY 1.4MM WIRE

Whites Pro Series Heavy Duty Chicken Netting is made from a 1.4mm galvanised steel wire, offering a robust combination of strength and reliability. As a heavy duty all-purpose woven steel netting with an aperture of 5cm, it is ideal for poultry yards, chicken coops and other animal enclosures, plant protection and garden trellising.

Code	Product Description	Size
10469	Chicken Netting Heavy Duty 30m	90cm
60161	Chicken Netting Heavy Duty 10m	120cm
60170	Chicken Netting Heavy Duty 10m	90cm

Handy Hint:

- Be sure to take into account the wire diameter, aperture and roll size when selecting netting for a project.
- To view our entire range of mesh and netting click on the 'shadow board' image in the photo gallery at the top of this page
- It is recommended that new galvanised wire mesh used in aviaries and pet cages be treated to remove excess zinc that could possibly harm pets. Shave off any zinc spikes with a utility knife. The mesh should then be scrubbed with a mild solution of vinegar (2 cups in a bucket of water) and rinsed with clean water.
- Beware of coil when opening roll. Always wear gloves and eye protection when handling.
- When constructing a pet enclosure, try Whites steel [Ultraposts](#) for a strong and sturdy frame, securing the netting with [tie wire](#) or [netting clips](#). Alternatively, Whites [Garden Posts](#) offer a unique lug fixing method for attaching netting.
