

Supa-Net

Outdoor Essentials / Landscaper's Materials

- Virtually invisible when installed
- High tensile strength
- Chemical resistant and rot proof
- Easy to cut, shape and install
- UV stabilised for long life

HIGH STRENGTH AND VERSATILE

Whites Supa-Net is made from bi-oriented plastic to create a safe protective net that is lightweight but high in strength. The fine black mesh is virtually invisible when installed. Its high tensile strength means it can be made lighter and less obtrusive than traditional plastic netting, yet still remain resilient. It's easy to cut and shape and is installed using staples or loop ties.

Available in Black, 20mm and 50mm square apertures, and three heights: 600mm, 900mm, 1200mm.

These have so many uses:

- Attach to balcony or deck railings to stop items accidentally falling off
- Rigid enough to use as a trellis on walls and fences
- A leaf net over ornamental ponds (20mm aperture)
- Light-weight garden fencing and partitioning (50mm aperture)

Code	Product Description	Size
15506	Supa-Net - nom. 20mm x 20mm aperture	600mm x 10m
15509	Supa-Net - nom. 20mm x 20mm aperture	900mm x 10m
15512	Supa-Net - nom. 20mm x 20mm aperture	1200mm x 10m
15507	Supa-Net - nom. 50mm x 50mm aperture	600mm x 10m
15510	Supa-Net - nom. 50mm x 50mm aperture	900mm x 10m
15513	Supa-Net - nom. 50mm x 50mm aperture	1200mm x 10m

Handy Hints:

- Animals may be able to chew through plastic netting.
- Size may vary due to the thermoplastic nature of the netting and some light trimming of edges may be required.
- It's not recommended for use as anti-bird netting.
